Table of Contents of "HANDBOOK FOR CONSTRUCTION"

1. General Part	
I. Weights and Measures (Metric, English)	
1. Linear Measures	22
2. Surface Measures (Square)	
3. Volume Measures (Cubic)	23
4. Weight Measures	
5. Units of Heat, Work, and Power	
6. Comparison of the Various Technical Units	
II. Mathematics	
1. Important Numerical Quantities	
2. Table of Powers and Roots of Numbers from 1 to 1000	24
3. Natural Trigonometric Functions	27
4. Roots of Quadratic Equations	28
5. Powers of Binomials	
6. Approximate Values of Certain Expressions	
7. Areas and Data of the Most Important Geometrical Figures	29
8. Surface F and Volume V of Certain Geometrical Bodies	31
9. Certain Trigonometric Formulae	32
10. Solution of Rectangular Triangles	33
11. Solution of Oblique-angle Triangles	
III. The Strength of Materials	
1. Modulus of Elasticity E and Tensile Strength of Materials	34
2. Moments of Inertia, Moments of Resistance, and Areas of Figures	35
3. Bearing Reaction, Bending Moments in Continuous Beams	44
4. Bearing Reaction, Maximum Bending Moments and Deflections	
5. Grades of Shaped Steel	51
6. Railroad Rails	57
7. Steel Pipes, Seamless	58
8. Wire Cables	60
2. Constructions	
I. Wooden Constructions	
1. Permissible Stresses	62
2. Design of the Elements of Wooden Construction	64
3. Stresses in the Elements of Wooden Construction	65
4. Allowable Forces in Tons in Central Compression of Pine or Spruce	70
5. Allowable Tensile Forces in Tons in Steel Rods	71
6. Moments of Resistance of Rectangular Cross Sections	72
7. Area, Moment of Inertia, and Moment of Resistance of Beams, etc.	73

II. Steel Construction

- | | |
|---|----|
| 1. Materials | 74 |
| 2. Permissible Stresses | 75 |
| 3. Computation of the Limit of the Elements in Steel Construction | 78 |
| 4. Design of the Elements of Steel Construction | 81 |

III. Ferroconcrete and Concrete Constructions

- | | |
|---|-----|
| 1. Calculated Tensile Strength of Concrete | 90 |
| 2. Calculated Yield Points for Various Steel Reinforcements | 91 |
| 3. Grades of Flat Reinforcements | 92 |
| 4. Use of Trenches as Reinforcing | |
| 5. Safety Factors K | 94 |
| 6. Coefficient ϕ of Buckling for Ferroconcrete and Concrete | 96 |
| 7. Design of the Elements of Ferroconcrete Construction | |
| 8. Design of Non-reinforced and Slightly-reinforced Concrete Elements | 105 |

IV. Brick and Reinforced Brick Construction

- | | |
|--|-----|
| A. Calculations and Designs of Brick Constructions | |
| 1. Tensile Strength of Brick Masonry | 107 |
| 2. Safety Factor of Strength | 108 |
| 3. Modulus of Elasticity of Brick Construction | 109 |
| 4. Design of Solid Continuous Brick Construction | 110 |
| 5. Design of Multi-layer Walls | |
| B. Calculations and Designs of Reinforced Brick Construction | |
| 1. Reinforcing | 111 |
| 2. Computations of Reinforcing | 113 |

V. Essential Bases of Industrial and Civil Buildings and Constructions

- | | |
|--|-----|
| 1. Characteristics of Grounds and Foundations | 114 |
| 2. Permissible Pressures on the Ground | 115 |
| 3. Depth of Foundations Depending on Moisture, Frost Line, Size, etc | 120 |

VI. Brick Walls, Columns, and Foundations

- | | |
|--|-----|
| 1. Wall Thickness | 122 |
| 2. Columns, Shafts, and Walls | 124 |
| 3. Anchoring and Bond | 126 |
| 4. Foundation Bases and Basement Walls | 127 |
| 5. Deformation Joints | |

VII. Floors of Industrial Buildings

- | | |
|-------------------------|-----|
| 1. Floor Types | 128 |
| 2. Choice of Floor Type | 130 |
| 3. Floor Slopes | 132 |

VIII. Roofing

- | | |
|--|-----|
| 1. Roof Types; Minimum Slopes; Weight per Square Meter | 133 |
| 2. Roof Foundation | 135 |
| 3. Main Constructional Data | 138 |
| 4. Vapor Proofing of Roofs | |

- 3 -

3. Constructional Heat Engineering	
1. Basic Concepts	140
2. Calculation of Heat Losses	141
3. Calculation of the Coefficients of Heat Transmission of Barriers	145
4. Determination of Attainable Magnitudes of K for External Barriers	
5. Coefficients of Heat Transmission of Certain External Barriers	
6. Inspection of External Barriers for Condensation	146
4. Constructional Materials	
I. General Information	
1. Weights of the Main Structural Materials and Their Transportation	148
2. Determination of the Densities (Specific Gravities) of Fluids	149
3. Density of Fluids (gases)	151
4. Mass Volumetric Weight of Common Materials Used in Constructions	
II. Binders for Concrete and Solutions	
1. Lime and its Substitutes	152
2. Gypsum Binders	154
3. Magnesium Binders	155
4. Soluble and Liquid Gases	159
5. Hydraulic Cements	
6. Properties and Uses of Cements for Concrete in Constructions	162
III. Additives Used for the Purpose of Economizing on Cement	
1. General Indications	165
2. Additives Used Instead of Portland Cements	166
3. Choice of Additives	167
4. Demands Made upon Additives Used for Cements	
IV. Fillers	
1. Sand and Gravel	168
2. Gravel and Crushed Stone Made from Mixed Materials	169
3. Blast-Furnace Slags and Other Metallurgical Waste Lumps	170
4. Brick Rubble	
5. Fuel (Boiler) Slags	
V. Mortars	
1. Measures for Economizing on Cements in Mortars Used in Brick Laying	171
2. Kinds of Mortars	172
3. Composition of Mortars	173
VI. Concretes	
1. Kinds of Concretes	182
2. Simplified Selection of the Composition of Ordinary Concrete	183
3. Hardener Accelerators for Concrete	186
4. Hardening Modulators	
5. Slag Concrete for Concrete and Ferroconcrete Constructions	
6. Reuse of Cured or Partially-Cured Concrete and Mortar	189
VII. Natural and Artificial Bricks for Foundations and Walls	
1. Natural Brick Materials	192
2. Bricks	194
3. Concrete Stones for Walls and Foundations	195
4. Artificial Stones from Gypsum	199
5. Use of Face Bricks and Stones from Demolished Buildings	200

VIII. Pipe, Earthen Blocks and Stabilized Earthen Materials

- | | |
|--|-----|
| 1. Pipe and Earthen Blocks and Stabilizers | 202 |
| 2. Types of Earthen Blocks | |
| 3. Stabilized Earthen Materials | 205 |

IX. Metals Used in Construction and Metallic Items

- | | |
|---------------------------------------|-----|
| 1. General Data | 206 |
| 2. Kinds of Steels Used in Structures | 208 |
| 3. Metallic Objects (METEZY) | 213 |

X. Lumber

- | | |
|--------------------------|-----|
| 1. Logs and Sawed Timber | 218 |
| 2. Plywood | 219 |
| 3. Parquet | |

XI. Roofing Materials

- | | |
|--|-----|
| 1. Paper Roofing Materials | |
| 2. Substitutes for Ordinary Paper Roofing (Plastic Sheets) | 221 |
| 3. Roof Tile | 223 |
| 4. Roofing Asbestos-Cement Materials | |
| 5. Roofing Materials from Wood | 224 |

XII. Tar and Pitch Binders

- | | |
|---|-----|
| 1. Petroleum Asphalts | |
| 2. Cements and Covering Lacquers and Paints for Roofing Tiles | 225 |
| 3. Bituminous Compositions | |
| 4. Petroleum Asphalt GUDRON | 226 |
| 5. Tar Binders | |
| 6. Tar Concretes | |
| 7. Pine Pitch (Pine Tar) | 228 |
| 8. Petroleum Tar Products | |

XIII. Pipes Used in Water Supply, Sewage, and Heating

- | | |
|---|-----|
| 1. Cast Iron Pipes Used in Carrying Water | |
| 2. Substitutes for Lead Used in the Calking of Bell-Mouth Pipes | 231 |
| 3. Steel Pipes | |
| 4. Nonmetallic Pipes | 233 |

XIV. Sundry Materials

- | | |
|---|-----|
| 1. Asbestos Sheets | 236 |
| 2. Felt, Fabric, Matting | |
| 3. Calkum, Tow, Hemp Fiber, Fiber Packing | 237 |
| 4. Bone Glue | |
| 5. Sheet Glass | 238 |
| 6. Glass Bituminous Putty | 239 |
| 7. Pressboard and Straw Board (SOROMITE) | |
| 8. Fibrolite | 240 |
| 9. Floor Slabs and Tiles | |

XV. Ferroconcrete Members

- | | |
|---|-----|
| 1. Ferroconcrete Window Sills | |
| 2. Concrete and Ferroconcrete Steps | 241 |
| 3. Ferroconcrete Sectional Cross Pieces | 242 |
| 4. Ferroconcrete Roofing Tiles and Slabs | 244 |
| 5. Reinforced Foam-Concrete Tiles and Slabs | 249 |
| 6. Ferroconcrete Beams and Flooring | 251 |

XVI. Members Made from Gypsum Concrete and Ferroconcrete	253
5. Power Producing Installations	
I. General Information	256
1. Calorific Value of Fuels	257
2. Efficiency of Thermal Installations	257
3. Hourly Expenditure of Fuel	
II. Steam Engines	
1. Power of the Steam Engine	258
2. LOKOMOBIL (Locomotive Steam Engine Carried Over Roads)	
III. Internal Combustion Engines	
1. Types of Engines	259
2. Expenditure of Fuel in Kilograms per Horsepower-Hour	260
3. Characteristics of Certain Internal-Combustion Engines	
IV. Gas Works	262
V. Mobile Electric Power Plants	264
6. Electrical Engineering and Electrical Installations	
I. General Data on Electrical Engineering	270
1. Practical Electromagnetic Units	271
2. Relations Among the Main Quantities of Electrical Technology	272
3. Resistance of Conductors	
4. Thermal Action of the Electrical Current	
5. Electrical Properties of Various Materials	
II. Conductors and Cables	273
1. Types	275
2. Loads Permissible Over a Long Period of Time	276
3. Conductors Computed on the Basis of Voltage Drop	278
4. Computations for Steel Single-Core Conductors	
III. Illumination of Areas Under Construction	
1. Lighting of Roads and Passages	279
2. Lighting of Working Areas During Construction	
IV. Power Distribution	280
1. General Indications	
2. Crossing and Passage of Power Transmission Lines	
V. Sources of Electrical Energy	281
1. Determination of the Capacity of Transformer Substations	282
2. Transformer Installations with Overhead Inlet and Outlet Leads	
3. Transformer Substations on Poles	
4. Covered Transformer Substations	
5. Data on General Three-Phase Power Transformers with Oil Cooling	
6. Data on the Expenditure of Electrical Energy During Construction

7. Construction Machinery

I. Technical Characteristics of Construction Machinery

	288
1. General Indications	
2. Earth Excavation and Road Building Machinery	293
3. Pile Driving Machinery	294
4. Crushers, Sorters, Concentrators of Raw Ores	297
5. Concrete Making Machinery; Preparing and Carrying of Mortar	300
6. Machinery Used in Operations with Reinforcing Rods and Forms	301
7. Machinery Used in the Preparation of Concrete Objects	303
8. Horizontal and Vertical Transportation	310
9. Machines and Instruments Used in Drilling	312
10. Wood Working Machines	316
11. Machinery Used in Sanitation Engineering	317
12. Pumps	318
13. Compressors	

II. Calculation of the Capacity and Productivity of Construction Machinery

	321
1. Bucket Excavator (Single Bucket)	322
2. Multi-Bucket Excavator	
3. Trailer Earth Movers	323
4. Drag-line Scrapers	325
5. Rock Crushers	
6. Flat Vibrating Screening Machines	326
7. Concrete Mixers and Mortar Mixers	
8. Belt Transporters	328
9. Bucket Elevator (Bucket Conveyers)	329
10. Worm Conveyor	
11. Construction Elevators	

III. Information on the Exploitation of Construction Machinery

	330
1. Basic Norms Governing the Productivity of Machinery	332
2. Basic Data on the Effectiveness of Machine Shifts and Relays	336
3. Basic Data on the Repair and Replacement of Machinery	338
4. List of the Main Educational Handbooks on Construction Machinery	

8. Transportation

I. Automobile Roads and Railroads

1. Classification of Auto Transport Roads	
2. Basic Data on Roads	
3. Basic Data on Railroads	
4. Table for the Laying Out of Curves	
5. Table of Signs for Curves	

II. Means of Transportation

	347
1. Technical Characteristics of Tractors	348
2. Technical Characteristics of Automobiles Made in the USSR	350
3. Technical Characteristics of Imported Automobiles	351
4. Technical Characteristics of Automobile and Tractor Trailers	353
5. Technical Characteristics of Steam-Engine Locomotives	355
6. Technical Characteristics of Diesel Locomotives and Hand Cars	356
7. Technical Characteristics of Railroad Cars	358
8. Technical Characteristics of Trucks (Wheels 750 mm)

III. Organization and Exploitation of Transports

1. Main Computations	359
2. Manual Transport	360
3. Vehicular Transport	361
4. Automobile-Tractor Transport	363
5. Rail Transport with Mechanical Traction	372
6. Fuel Expenditure per 100 Ton-Kilometers of Haulage	375
7. General Comments	378

9. Productive Enterprises, Warehouses, and Buildings of Construction Organizations**I. Productive Enterprises of the Construction Organizations**

1. Main Indications	380
2. Schematic Examples of Productive Enterprises	388

II. Warehouse of the Construction Enterprises

1. Determination of the Size of Storage Areas and Loads	392
2. Norms Governing the Natural Loss of Materials in Storage & Haulage	398

III. Residential, Cultural, Administrative Buildings

1. General Remarks	402
2. Residential Buildings	
3. Structural Characteristics of Low-Storey Residential Houses	406
4. Public Eating Places	
5. Characteristics of Restaurants and Their Expenditures of Materials	407
6. Community Houses and Hospitals	408
7. Characteristics of Hospitals etc and Expenditures of Materials	409

IV. Short Description of Safeguards Against Fires 410**10. Sand and Gravel Pits****I. Prospecting for Deposits of Gravel and Sands**

1. Determination of the Supply of the Deposits	414
2. Choice of the Method of Prospecting Operations	

II. Discovery of Deposits and the Excavation of Minerals

1. Operating Schemes and Their Accelerated Enforcement	415
2. Choice of Height and the Slope Angle of the Bench	418

III. Drilling and Blasting Operations

1. Characteristics of Grounds Worked by Digging Operations	
2. Main Explosives Used	419
3. Methods of Conducting Drilling Operations	421

IV. Handling of the Materials in the Pits

1. Scheme for an Installation to Crush 7 m ³ of Rocks per Hour	423
2. Capacity of Crushers	
3. Characteristics of the Products from Crushers	424
4. Location and Installation of Sorting Screens	
5. Scheme for an Installation to Sort Crushed Rocks up to 10 m ³ per Hour	425
6. Data on Bunker Installations

11. Geodesic Operations

I. Theodolite and Level

- | | |
|--|-----|
| 1. Theodolite Tests | 428 |
| 2. Testing the Levels | 429 |
| 3. Measurement of Angles by the Theodolite | 430 |
| 4. Conducting the Leveling Operations | 431 |

II. Methods of Geodesic Base Finding and the Solution of Problems

- | | |
|---|-----|
| 1. Geodesic Bases of the GENPLAN (General Plan) | |
| 2. Solutions of the Main Geodesic Problems | 435 |

III. Layout of Constructions

- | | |
|--|-----|
| 1. Methods for Laying Out the Constructions (Pegging the Lines, etc) | 436 |
| 2. Laying Out of Circular Lines | 438 |
| 3. Actual Transference of Blueprint Plans to Building Activity | |

12. Execution of Operations

I. Ground Operations

- | | |
|--|-----|
| 1. Main Rules Governing the Execution of Ground Operations | 442 |
| 2. Grounds and Their Properties | 443 |
| 3. Main Technical Requirements in the Erection of Ground Installations | 444 |
| 4. Manual Tools Used in Ground Operations | 446 |
| 5. Manual Labor in Digging Operations | 447 |
| 6. Mechanized Labor in the Digging and Other Ground Operations | 449 |
| 7. Labor Front | 452 |
| 8. Shoring and Bracing Operations | |

II. Bricklaying Operations

- | | |
|---|-----|
| 1. Production Forms in Bricklaying | 453 |
| 2. Mortar Used in Bricklaying | 456 |
| 3. Bricklayers | 463 |
| 4. Cutwork of Work and the Expenditure of Materials | 464 |
| 5. Timber and Scaffolding | 468 |
| 6. Instruments, Equipment, and Implements | 478 |

III. Preparation of Cement Molds

- | | |
|--|-----|
| 1. Basic Sizes of the Cement Forms | 477 |
| 2. Expenditure of Timber in Forms and Scaffolding | 480 |
| 3. Stalnovite Tools and Equipment Used in Form Building Operations | 481 |
| 4. Production and Setting Up of Cement Forms | 483 |
| 5. Dismantling of the Forms | |

IV. Operations Involving the Installation of Reinforcing Rods

- | | |
|---|-----|
| 1. Dimensions of the Protective Concrete Layer Over Steel Structures | 484 |
| 2. Joining of Reinforcing Rods | |
| 3. Rules Governing the Substitution of One Size Rod by Another | 485 |
| 4. Labor Force Used in the Installation of Reinforcing Rods | |
| 5. Tools and Equipment Used in Operations with Reinforcing Rods | 486 |
| 6. Expenditures of Steel Rods per 100 m ³ of Ferroconcrete | |
| 7. Amount of Rods for Various Structural Elements (per 100 m ³) | 487 |

V. Concrete Pouring Operations

- | | |
|--|-----|
| 1. Preparation and Transportation of Concrete | 490 |
| 2. Pouring of the Concrete | 493 |
| 3. Handling of the Concrete | 494 |
| 4. Elimination of Defects in the Concrete Work | |

VI. Preparation and Erection of Steel Constructions

- | | |
|---|-----|
| A. Preparation of Steel Structures | 495 |
| 1. Data for Computations at the Workshop | 498 |
| 2. Molder and Compressor Equipment | 499 |
| 3. Recommended Stalimovite Tools and Equipment | 501 |
| 4. Mechanized Tools | |
| 5. Molding and Folding of Metals | |
| 6. Preparation and Working of Structural Elements | |
| 7. Selection and Assembly of the Construction | 502 |
| 8. Electrical Welding | |
| 9. Drilling, Riveting, and Stamping | 506 |
| 10. Release of the Finished Product | |
| B. Erection of Steel Structures | |
| (Very Simple Tackle Equipment) | 507 |
| 1. Steel Ropes, Cables, and Slings | 510 |
| 2. Blocks, Pulleys, and Hoists | 511 |
| 3. Lifting Jacks | 512 |
| 4. Poles and Masts | 514 |
| 5. Bracing by Guy Ropes and Struts | |
| (Erecting Operations) | 515 |
| 6. Materials Required in Erecting Operations | 516 |
| 7. Recommended Methods for the Erection of Steel Structures | 519 |
| 8. Tools and Equipment | 522 |
| 9. Suspension of Heavy Structures | 524 |
| 10. Ensuring the Stability of Girders During the Erection | 525 |
| 11. Completion of the Erecting Operations | |

VII. Carpentry Operations

- | | |
|------------------------------------|-----|
| 1. Handling of the Lumber | 526 |
| 2. Drying of the Lumber | 531 |
| 3. Measures Against Decay and Fire | 533 |
| 4. Wood Working Operations | 550 |

VIII. Plastering Operations

- | | |
|---|-----|
| 1. Types, Composition, Conditions of Mortars in Plastering Operations | 558 |
| 2. General Rules Governing the Execution of Plastering Operations | 560 |
| 3. Tools and Equipment Used in the Plastering Operations | 561 |
| 4. Lumber and Scaffolding Used in Plastering Operations | 562 |
| 5. Plasterers | 564 |
| 6. Expenditures of Material and Labor | 565 |
| 7. Defects in Plaster, Methods for Their Elimination and Prevention | 568 |
| 8. Collapse of Plaster Due to High Temperatures | 569 |
| 9. Requirements in the Inspection of Plastering Works | 570 |

IX. Painting Operations

- | | |
|--|-----|
| 1. Execution of Painting Operations | 571 |
| 2. Machines and Tools Used in the Execution of Painting Operations | 574 |
| 3. Prescriptions for Paint Ingredients | 577 |
| 4. Substitutes for Deficient Materials and Scarce Materials | 582 |
| 5. Control of the Quality of the Work | 587 |
| 6. Expenditure of Materials in Painting Operations | 590 |

X. Roofing and Water Proofing Operations**A. Roofing Operations**

1. Tools and Equipment for Conducting Roofing Operations 591
2. Expenditure of Materials per 1 m² of Roof 594
3. Recommended Composition of Tars (Cements) for Paper Roofing etc 595

B. Water Proofing

4. Execution of Water Proofing Operations in Buildings and Installations

XI. Welding and Cutting of Metals

1. Types of Welds 597
2. Equipment Used in Electric Arc Welding
3. Equipment Used in Contact Welding 599
4. Electric Cables and Leads Used in Welding Machines
5. Electric Cables and Electrodes 600
6. Equipment and Materials Used in Gas Welding 601
7. Welding of Steel 602
8. Welding of Special Steels 604
9. Welding of Cast Iron
10. High-Speed Automatic Welding Under Flux
11. Welding of Nonferrous Metals 605
12. Control of the Quality of Welds 606
13. Autogenous Cutting of Metals
14. Electric Arc Cutting of Metals 608
15. Regulations Governing the Admission of Welders to Important Jobs

13. Winter Operations**I. Ground Operations**

1. Breaking of Frozen Ground 610
2. Thawing of Ground by Steam
3. Electrical Heating of the Ground 611
4. Construction of Embankments 612

II. Bricklaying Operations

1. Bricklaying Under Winter Conditions 614
2. Methods for Imparting to Mortar its Necessary Strength Before Freezing
3. Laying by the Method of Freezing
4. Laying of Rubblestone with the Addition of CaCl₂ and Vibration 621
5. Bricklaying in Temporary Enclosures
6. Electrical Heating of the Bricklaying Works 622
7. Tests of the Strength and Stability of Winter Bricklaying 623

III. Concrete Pouring Operations

1. Hardening of Concrete Under Winter Conditions
2. Methods of Executing Concrete Pouring Operations During the Winter 625
3. Thermos Method 626
4. Method of Conducting Operations with Artificial Heating 631
5. General Conditions and Peculiarities of Winter Operations 639

IV. Remaining Operations

1. Roofing Operations 641
2. Finishing and Trimming Operations
3. Welding of Steel Structures 642

A. Comfort Heating

I. General Information

648

II. Heating Network

1. Determination of the Amount of Heat Required 650
2. Choice of the Heating Medium
3. Conduits 651
4. Insulation of the Heating Pipes 652

III. Stoves

1. Heat Emission of Small and Large Stoves ($\text{Cal/m}^2\text{-hr}$) Exposed 655
2. Approximate Selection of Stoves

IV. Central Heating Systems

1. Determination of the Heating Surfaces of Boilers 657
2. Expenditure of Fuels by the Boiler
3. Selection of the Steam Pressure for Low-Pressure Steam Systems 658
4. Distance Between Pipe Bracings, and the Size of Slope Angles
5. Boilers
6. Chimneys 661
7. Heating Devices 663
8. Expenditure of Labor, Materials, and Equipment in Water Heating etc 666
9. Start and Finish of the Operation of Central Heating Systems 667

B. Water Supply and Conduits; Sewage

I. Water Supply

1. Specific Consumption of Water in a Building 668
2. How to Compute the Consumption of Water 669
3. Selection of the Diameters of Water Pipes 670
4. How to Compute the Head and the Height of Water Towers
5. Computation of the Power of Pumps 672
6. Main Characteristics of Automatic Fire Pumps and Manual Pumps
7. Depth That Water Pipes Are Laid
8. Expenditure of Labor and Materials for Water Pipes of Cast Iron etc 673
9. Expenditure of Labor and Materials for Steel Pipes per 100 m 674
10. Excerpts from Specifications on Execution and Acceptance of General and Special Constructional Works of the NARKOMSTROY (Peoples' Commissariat of Construction)

II. Sewage

1. Determination of the Size of Sewage Pipes 675
2. Determination of the Capacity of Cesspools 676
3. Depth That Sewage Pipes Must Be Laid
4. Excerpts from the NARKOMSTROY Specifications

15. Engineering and Economical Indices

I. Indices Governing Expenditures of Materials in Various Parts of a Building

1. Foundation 680
2. Walls 681
